

# Project: Health Prescription & Appointment Management System

## Phase 10: Final Presentation & Demo

### Purpose

This phase marked the culmination of the project, where the team showcased the solution to stakeholders through a professional pitch presentation, a live system demonstration, and formal documentation handoff. Additionally, steps were taken to highlight the project externally through portfolio and LinkedIn updates to support career growth.

### 1. Pitch Presentation

- A structured pitch deck was created to explain the project vision, problem statement, proposed solution, and key benefits.
- The presentation highlighted how the Health Prescription & Appointment Management System improves healthcare efficiency by:
  - Simplifying appointment booking for patients.
  - Providing doctors with streamlined prescription management.
  - Enabling future integration with pharmacies and telemedicine platforms.
- Clear visuals and real-world use cases were included to communicate the project's value effectively.

### 2. Demo Walkthrough

- A live demonstration of the Salesforce application was conducted.
- The walkthrough covered:
  - Patient registration and appointment scheduling.
  - Doctor assignment and prescription creation.
  - Real-time updates to appointment status.
  - Admin features such as tracking and managing health records.
- The demo emphasized how the system is user-friendly, secure, and ready for further integration.

### 3. Handoff Documentation

- A complete project handoff document was prepared, including:
  - System architecture overview.
  - Configuration steps (objects, fields, relationships).
  - Screenshots of key modules.
  - Details of integrations (Remote Site Settings, APIs).
  - Future scope and recommendations.
- This ensured that future developers or administrators can continue building on the system without dependency on the original team.

### Conclusion

Phase 10 successfully wrapped up the Health Prescription & Appointment Management System project with a strong final presentation, a seamless demo, detailed documentation, and professional portfolio updates. This ensured both project closure and long-term value in academic and career contexts.
